DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: the abstract contains legal language such as "comprises".

Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2824

3. Claims 75 – 87 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 – 10 of U.S. Patent No. 6,627,933.

Although the conflicting claims are not identical, they are not patentably distinct from each other because Juengling (US 6,627,933) discloses at least one isolation region formed within a semiconductor substrate [column 10, lines 6-9] and a gate stack spacing which is less than 400 Angstroms [column 10, lines 1-2]. The range disclosed in Juengling overlaps the claimed ranges of about 100 to 400 Angstroms and about 100 to 300 Angstroms, and therefore a *prima facie* case of obviousness exists.

In the case where the claimed ranges “overlap or lie inside ranges disclosed by the prior art” a *prima facie* case of obviousness exists. In re Wertheim, 541 F.2d 257, 191 USPQ 90 (CCPA 1976); In re Woodruff, 919 F.2d 1575, 16 USPQ2d 1934 (Fed. Cir. 1990)”. [A] prior art reference that discloses a range encompassing a somewhat narrower claimed range is sufficient to establish a *prima facie* case of obviousness.” In re Peterson, 315 F.3d 1325, 1330, 65 USPQ2d 1379, 1382-83 (Fed. Cir. 2003).

Allowable Subject Matter

4. Pending a properly filed terminal disclaimer, claims 75 – 87 are allowable.

5. The following is a statement of reasons for the indication of allowable subject matter: applicant discloses a novel semiconductor structure which, in the context of the entire claim, has a plurality of gate stacks which are spaced apart by about 100 Angstroms to 400 Angstroms or 100 Angstroms to 300 Angstroms.

Art Unit: 2824

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art teaches gate stacks which are spaced apart by about 500 Angstroms, but not less than that amount.

7. A copy of the search history (EAST and STN) is enclosed.
